· Expert level in DB2

· Expert level in CICS

· Expert level in Easytrieve

· Expert level in Jobtrac

· Expert level in SYNCSORT

· Expert level in Zeke

· Expert Level in Changeman

· Expert Level in Stored Proc

· Expert Level in PL/SQL

EXPERIENCE

· **Project Lead/Onsite Coordinator**

Company:
SYNTEL INC, Nashville, TN

Tenure: Oct'2014 – Till Date

Project: Financial & EDW reporting- Hospital Corporation of America (HCA)

Financial Reporting is one of the major applications used by HCA (Payer) for hospital and Corporates managed under their Umbrella. Hospital Expenses, Payment, Patient and Invoice data coming from legacy systems and other platforms are put together and utilized for strategic decision and reporting purpose. Syntel provides Maintenance, Enhancements and Support services for Legacy and EDW applications.

Technology used: IBM Z/OS Mainframe using COBOL, DB2, JCL, VSAM, CICS, SYNCSORT, File Manager, Jobtrac , CA/Abend Aid and Changeman

Responsibilities:

· Experience with HCA IT partners as a programmer to estimate, draft requirement and detailed design document.

· Automated the critical year-end TAX reporting across HCA managed hospital to reduce the manual effort by 60%.

· Point-of-contact on a major HCA upgrade to Lawson suite.

· Analyzed and scheduled QA batch and CICS online environment to allow parallel testing and automated balancing reports between two different applications.

· Experience to create the functional business/Functional requirement to aid in code construction & development

· Worked and Co-ordinate with different global application teams during development and testing phase to ensure effective & successful execution of the project

· Improved SLA for resolving the Remedy ticket and RFS task for multiple application.

· Experience to manage offshore team, review Code and QA Test case as per the design/Functional requirement agreed with Business

· Supported change control process through technical analysis and timely delivery

· Reduced and Resolve the daily production abend and improved the batch cycle time which runs 4 times a day to meet all SLA's.

· Proposal submission, SOW framing procedural activities and Billing activities.

· ITGRM Activities.

· **Sr Analyst Programmer**

Company: SYNTEL Pvt Ltd. at Pune, INDIA

Tenure:
 April'10 – Oct'14

Project: Merchant bank Account Initiation (MAI)

MAI performs the merchant credit underwriting of new merchants. This interface helped retrieve merchant information by sending a request from MAI CICS host server to the HTTPS host server protocol and store their response in a VSAM file. This would be used as one of the parameters of credit under writing process. Have also worked on the merchant on-boarding and settlement application.

Technology used: IBM Z/OS Mainframe using COBOL, DB2, IMS, JCL, VSAM, CICS, SYNCSORT, File Manager, Jobtrac, Easytrieve and CA/Abend Aid

Responsibilities:

· Led a cross-functional technical team in the implementation of optimized front end and backend processing for merchant underwriting.

· Conceptualize and implemented the design of 24/7 online CICS region by reducing the downtime from 1 hour to close to 10 min while the batch updates are running.

· Worked on the proposal and design of real time merchant fraud and detection process for First data merchant on boarding application.

· Lead and Developed new CICS screens to cater a real time authorization using web services at the time of merchant underwriting process.

· Developed and Deployed conversion flows of data from legacy to Sales Force platform. This also involved providing insight to merchant on boarding and settlement process design in mainframe to upgrade to Sales Force platform.

· Coded and implemented an IMS program, PSB and PCB components to access the IMS database.

· Design and deployed custom programs to calculate merchant settlement fees and charges.

· Performed the requirement analysis, feasibility study, functional analysis and impact analysis for the new and existing applications.

· **Associate Consultant/Programmer**

Company: Capgemini Pvt Ltd. at Pune, INDIA

Tenure: Aug'08 – April'10

Technology used: IBM Z/OS Mainframe using CICS, COBOL, JCL, Easytrieve, VSAM, SYNCSORT, File Manager and Jobtrac,

Responsibilities:

· Creating technical design document from the requirement document.

· Developed and tested logic to convert UTF8 to EBCDIC conversion of data for online CICS screens

· Responsible to develop CICS screens with backward and forward scroll in total 16 screens driven from one menu screen to traverse across the entire page screen along with the related fee functionality

· Coded REXX exec to automate the validation of COBOL coding standards across projects.

· Task included requirement analysis, Impact analysis, Coding, Testing and Delivery Created

· Data mapping, Test Cases and Unit Test Result.

· **Software Engineer**

Company: Attra Infotec Pvt Ltd. at Pune, INDIA

Tenure: Dec'07 – Aug'08

· Joined as Mainframe Vision plus trainee

· Coding, testing and deployment of a credit card on-boarding application.
